

IQS227/228AS Evaluation Kit 1

IQS227/228ASEV01 Evaluation Modules' Features:

- Modular design: Easily wired for rapid prototyping
- Reference design for IQS227/228AS with user proximity & touch detection ability
- LEDs indicate Proximity and Touch
- Can be powered from 1.8V to 3.6V DC
- OTP bits can be programmed with the Azoteq Configuration Tool CT210 (not included in the kit)

IQS227/228ASEV01 Kit includes:

- 2 x Module PCB with IQS227AS (TSOT23-6)
- 2 x Module PCB with IQS228AS (TSOT23-6)
- Optional: Configuration Tool (CT210) for OTP bit programming

CT210 not included in Evaluation Kit price
