1 Introduction

This user guide describes the operation of the IQS9151EV02 evaluation kit. The EV-Kit consists of two parts:

- > IQS9151 trackpad x 1
- > DS200 x 1

To visualise all sensor data from the EV-Kit, the module board can be interfaced to any Windows PC with USB support, along with the DS200 and the relevant IQS9151 Graphical User Interface (GUI) software available to download from the Azoteq website. The purpose of the IQS9151EV02 EV-Kit is to help application and development engineers in evaluating the IC's capabilities. A picture of the trackpad module from the evaluation kit is shown below in Figure 1.1.

Figure 1.1: IQS9151EV02 EV Kit

Download the GUI from [Azoteq's website](#).

The GUI can be found in the following section:

- > Design Support → Software
- > Click on the *IQS9151 Debug and Display Tool* hyperlink to download the GUI.
- > Install GUI on PC.
- > Connect the DS200 to the PC with a USB Type-C data cable.

2 Setting Up the IQS9151 Trackpad Module

To interface the IQS9151 trackpad module to a PC we advise using the DS200. This module is set up in mutual capacitive mode. This EV-Kit can be set up with the following steps:

- Plug the module into the DS200 via ribbon cable.
- Run the IQS9151 GUI.
- Click *START STREAMING* button.
- Data should now stream to the GUI.
- Click *ACK RESET* button.
- GUI should look as follow.

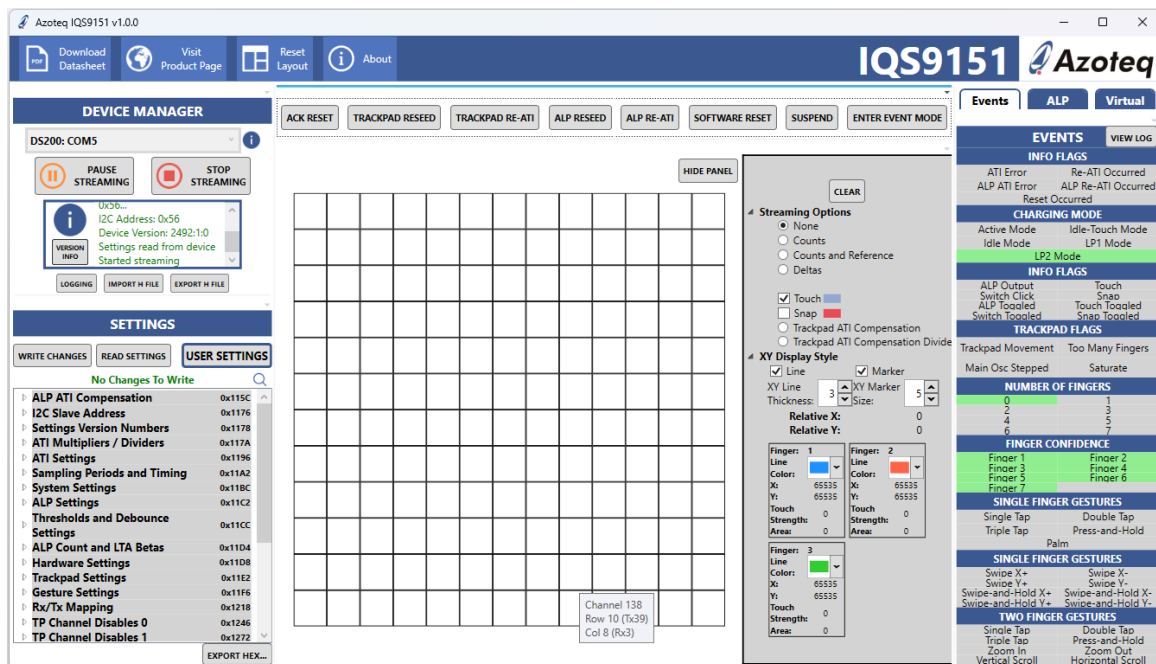

Figure 2.1: IQS9151 Streaming

Please note the following items while evaluating the IQS9151 trackpad module:

- Streaming channel data reduces the report rate of the trackpad, after evaluating the channel information (such as counts), it is recommended setting the Streaming Options to None.
- The trackpad XY output will be plotted onto the central channel canvas area.
- Numerous trackpad output and information, such as 1 and 2 finger gestures, can be seen on the 'Events' tab on the right side of the window.
- When the system transitions to LP1 and LP2, the low-power channel is active. To visualise its' data, switch to the 'ALP' tab on the right panel.
- To start adjusting/experimenting with the on-chip settings, press the *USER SETTINGS* button on the left side to open the pop-up settings window.
- Note: To reset the module back to the predefined settings, simply press *STOP STREAMING* and then *START STREAMING*.

After evaluating click *STOP STREAMING* button.
